

DATADOG Observability Platform Accelerator

Accelerate Your Journey from Reactive Monitoring to Proactive Observability

AC3's Datadog Observability Platform Accelerator helps you on the path to proactive, customer-centric observability. Guided by AC3's proven Observability Maturity Methodology, this expert-led engagement assesses your current platform coverage, instrumentation, and service alignment to identify clear opportunities for improvement.

The result is a curated roadmap and practical first steps to strengthen visibility, enhance performance monitoring, and reduce the risk of production outages, with minimal disruption to your operations.

Rapid Maturity Uplift

Gain a clear understanding of your observability maturity, and a practical roadmap to accelerate progress toward SRE best practices.

Targeted Service Visibility

Identify and baseline key service boundaries, ensuring your observability efforts focus on what matters most to your business..

Actionable SLO Insights

Establish meaningful Service Level Objectives (SLOs) based on Google's SRE Golden Signals to improve real-world service performance.

Executive-Level Dashboards

Establish up to two curated dashboards that visualise customer experience and service health in real time, driving smarter operational decisions.

Proactive Alerting Framework

Implement up to ten alert conditions to detect early deviations from SLOs, reducing downtime and preventing customer impact before it occurs.

Comprehensive Next Steps

Receive a clear and insightful report summarising maturity levels, performance results, and tailored recommendations to guide next steps.
